Skills

Angular, React, TypeScript,
Responsive Design

Node.js, Express.js, REST APIs, API
Integration, JWT Authentication

MySQL, SQL, SQLite, Firebase
Authentication, Firestore

Kotlin, Android Studio

Java, Object-Oriented Programming
(OOP)

Git, GitHub, Linux

Profile

Software Developer with a strong background in **front-end** and **full-stack development**, focused on creating modern, responsive, and user-centered applications. Experienced working with **Angular, React, TypeScript, Node.js, and RESTful APIs**, as well as relational databases such as **MySQL and SQLite**. Familiar with **Git-based workflows, Linux server environments**, and modern software development practices. Developed multiple academic and personal projects ranging from **e-commerce platforms, educational systems**, to **Android applications** and **real-time web solutions**. Adaptable, collaborative, and motivated to continue growing in professional software engineering environments.

Education

Bachelor's Degree in Computer Systems
Engineering

Dec 2025

Universidad Autónoma de Aguascalientes, Aguascalientes, Mexico

Projects

Full-stack Developer

Jan 2025 - Dec 2025

EGEL PRO — Educational Platform, Aguascalientes, Mexico

Angular • Node.js • MySQL • JWT • Firebase

- Developed a full-stack educational platform focused on exam preparation and user management.
- Built responsive frontend interfaces using Angular and integrated RESTful APIs with a Node.js backend.
- Implemented secure authentication and route protection using JWT.
- Designed and managed MySQL database structures for efficient data handling.
- Integrated email notifications and authentication features to improve user experience.

Full-stack Developer

Jun 2023 - Dec 2023

Gruas App (Tow Truck Service Platform), Aguascalientes, Mexico

Angular • TypeScript • Node.js • MySQL

- Built a full-stack tow truck service platform inspired by modern ride-sharing applications.
- Developed responsive frontend interfaces and an administrative dashboard for service management.
- Implemented backend APIs and database integration to support operational workflows and user requests.
- Focused on usability, responsive design, and scalable application structure.

Android Developer

Aug 2022 - Dec 2022

Mathquest Educational Game, Aguascalientes, Mexico

Kotlin • Android Studio • SQLite

Languages

English	
Spanish	

- Developed an interactive educational Android game focused on real-time gameplay and user engagement.
- Designed and implemented game mechanics, UI components, and responsive touch controls.
- Integrated sprite animations and gameplay interactions to improve user experience and immersion.
- Managed local data persistence using SQLite to store player progress and scores.
- Applied object-oriented programming principles to create scalable and maintainable game components.

Java Developer

Mar 2022 - Jul 2022

Plants vs Zombies Style Educational Game, Aguascalientes, Mexico

Java • Java Swing • Object-Oriented Programming

- Developed a tower defense game inspired by Plants vs Zombies using Java and Java Swing.
- Implemented enemy wave generation, level progression, and interactive gameplay mechanics.
- Applied object-oriented programming principles to create reusable and organized game components.
- Designed real-time animations and user interactions to enhance gameplay experience.
- Tested and debugged game systems to ensure smooth performance and balanced difficulty.
